

Reduce Costs, Improve Service, and Build Competitive Advantage with Automated Packing and Shipping

Pacejet extends NetSuite with complete web-based packing and multi-carrier shipping to manage all your parcel, partial load (LTL), truck, and custom shipments at home and abroad. Instantly rate and ship from sales orders or item fulfillment, quote freight, and automatically print carrier labels, advanced customer and industry labels (e.g., UCC128), bill of lading documents, and export documentation. Improve visibility with automatic capture of tracking numbers and freight cost, one-click shipment tracking, and built-in dashboards and reports. Pacejet automates shipping from NetSuite to reduce costs, improve service, and build competitive advantage.

Spend More Time Shipping and Less Time Typing

Manually re-entering data in carrier websites or software?

Worried about invalid shipping rates or time spent loading data files?

Pacejet Packing and Shipping takes the hassle out of shipping by leveraging direct carrier connectivity to provide accurate, up-to-date contract rates without the need for data downloads or software updates.

Forget about the time, cost, and complexity of system maintenance and focus on shipping with Pacejet.

Integrated Shipping that Is Faster and Easier with Features that Reduce Costs while Improving Service

Pacejet Packing and Shipping for NetSuite provides a complete set of multi-carrier shipping tools as an integrated extension to your NetSuite business system. Pacejet Packing and Shipping helps you:

- ✓ **Make Shipping Easier** with complete multi-carrier support for parcel, LTL, truck, and custom carriers and advanced features for rating, packing, paperwork, and exports in one solution.
- ✓ **Simplify Shipping Setup and Maintenance** with full web-based setup and operation that does not require PC-based shipping systems and easily supports multiple sites and workstations.
- ✓ **Speed Order Fulfillment** with NetSuite integration that eliminates duplicate data entry in shipping and automatically captures tracking numbers and freight costs.
- ✓ **Reduce Shipping Costs** with real-time carrier connectivity that displays rates and transit times for available carriers, allowing you to choose carriers by lowest cost, fastest delivery, or customer rule.
- ✓ **Build Competitive Advantage** with flexible packing that lets you easily record and validate shipping container dimensions, weight, item contents, freight class, and other details and automatically print customer-specific or industry-standard labels and paperwork.
- ✓ **Grow International Sales Revenue** using integrated parcel shipping for international destinations, freight forwarder support, and automated export documentation to simplify export processes, reduce errors, and eliminate non-compliance fees and delays.
- ✓ **Improve Customer Service** with easy one-click tracking of multiple shipments against a sales order, including direct hyperlinks to carrier websites to track deliveries while in transit.

Complete + Multi-Carrier + Web-Based → Shipping that's Faster, Easier, Less Costly

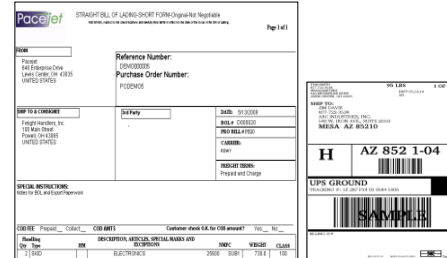

Pacejet Packing and Shipping for NetSuite leverages the power of the Internet to connect, automate, and streamline order fulfillment. The Pacejet solution provides the complete set of features you need to run fast, efficient, and highly automated order fulfillment processes.

Select	Carrier	Service	Mode	Arrival Date	Service Fee	Fuel Surcharge	List Price	Freight Cost	Freight Price

Reduce Shipping Costs and Time with integrated visibility to rates and transit times for all available carriers and integrated processing for parcel, LTL, truck, and custom shipments with one web-based solution.

Build Competitive Advantage with flexible packing that records and validates shipping container dimensions, weight, item contents, freight class, and other details to automate paperwork.

Speed Order Fulfillment with automatic printing of carrier labels, custom and industry labels, bill of lading documents, and export documentation.

Improve Customer Service with an easy-to-use shipping home page for shipment tracking and carrier hyperlinks for in-transit status.

Streamline Your NetSuite Order Fulfillment Process

Pacejet Packing and Shipping delivers integrated order fulfillment by leveraging standard integration, a fast and easy user experience, flexible adapter technology, and a simple/reliable setup.

- ✓ **Standard Integration** for NetSuite uses powerful web services with flexible data mapping support.
- ✓ **Fast and Easy** with point-and-click activation of shipping from sales orders or item fulfillment and shipment tracking from customer service.
- ✓ **Flexible Adapter** technology supports NetSuite customizations to add or change data mappings.
- ✓ **Simple and Reliable** installation uses your standard NetSuite setup for Internet, security, and web browsers.
