

Reduce Costs, Improve Service, and Build Competitive Advantage with Multi-Carrier Packing and Shipping

With the right tools, your shipping team can make every delivery a customer-experience that stands out from competitors while reducing costs, time, and manual labor to improve your profits. Pacejet Shipping, Logistics, and Mobile solutions help you connect, automate, and streamline order fulfillment processes more completely and more effectively than legacy software or the fragmented tools and websites you may be using today. Take a closer look at how Pacejet can help you improve profits and strengthen customer service.

Pacejet Shipping, Logistics, and Mobile software connects, automates, and streamlines order fulfillment to improve profits and customer service while reducing costs, time, and manual labor.

Spend More Time Shipping and Less Time Typing

Manually re-entering data in carrier websites or software? Pacejet Shipping, Logistics, and Mobile software takes the hassle out of shipping by leveraging direct carrier connectivity to provide accurate, up-to-date contract rates without the need for data downloads.

Easily see and manage all shipments with Pacejet shipping workbenches, dashboards, and shipping reports.

Break-Free from Legacy Software to Reach a New Level of Efficiency with a Dramatically Lower Cost of Ownership

Legacy shipping and warehouse software can be hard to use, costly to install and maintain, and often suffer from poor integration with order management and other systems. Pacejet Shipping, Logistics, and Mobile solutions help you break-free from the challenges of legacy shipping and warehouse software with a new value proposition:

- ✓ **Make Shipping Easier** with complete multi-carrier shipping for Parcel, LTL/Truck, User-Defined Carriers and advanced features for rating, packing, paperwork, and exports in one solution
- ✓ **Save Cash** with On-Demand (Software as a Service) subscriptions starting at \$79 per user-month or choose On-Premise software
- ✓ **Simplify Setup and Maintenance** with full web-based setup and operation that does not require PC-based shipping systems and easily supports multiple sites and workstations
- ✓ **Speed Order Fulfillment** with ERP software integration that eliminates duplicate data entry and eliminates errors
- ✓ **Improve Warehouse Productivity** with barcode scanning and mobile/wireless-RF solutions that reduce paper and errors
- ✓ **Reduce Shipping Costs** with real-time carrier connectivity that displays rates and transit-times for available carriers, allowing you to choose carriers by lowest cost, fastest delivery, or customer rule
- ✓ **Build Competitive Advantage** with personalized paperwork and labels for key customer requirements and flexible packing to record and validate container dimensions, weight, and class
- ✓ **Grow International Sales Revenue** using integrated parcel shipping for international destinations, freight forwarder support, and automated export paperwork to simplify export processes, reduce errors, and eliminate non-compliance fees or delays
- ✓ **Improve Customer Service** with easy one-click tracking of multiple shipments against a sales orders, including direct hyperlinks to carrier websites to track deliveries while in-transit

Complete, Flexible, Integrated Multi-Carrier Shipping, Logistics, Mobile Features

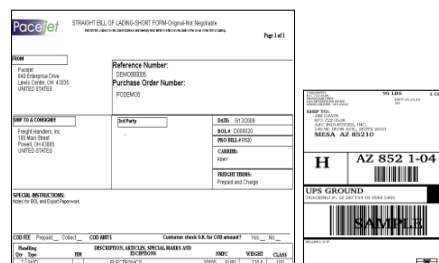

Pacejet Shipping, Logistics, and Mobile solutions leverage the power of the Internet to connect, automate, and streamline order fulfillment. Pacejet solutions provide the complete set of features you need to run fast, efficient, and highly automated order fulfillment processes.
